

18 Key Vision Milestones Ages birth-1year

Follow 18 Key Vision Milestones screener procedure. Recommend follow-up with vision provider when there is a family history of vision problems, and when developmental or visual inspection concerns exist.

SPOT Vision Screener Ages *1-3 years

Note:

*The SPOT vision screener can be used 6-12mo. but proven to be more reliable at 1 year.

Screening results and detailed notes from attempts will be documented via email and ChildPlus. FES will communicate with family at each level of screening, documenting in ChildPlus.

The *WCMCA Head Start Developmental and Social Emotional Referral Form* should accompany referral recommendation with reason for referral described in *developmental screening* section. If parents refuse referral to vision professional, FES will indicate on referral form.

18 Key Vision Milestones and SPOT Vision Screening Protocol (birth-3-years old)
